This is the view of the OES clock- match the unit to the display on ice. Wireless

SET the Time for Game on the clock.

Set home time for **RED clock** – home time button --- press -- the hour button shows 00 and flashes set 38 press enter minutes then seconds flash 00 press enter , now it should read 38:00 on the left side of screen

BLUE clock – home time button – press – the hour button flashing 00 set the time 38 press enter—add the minutes 00 press enter now the Blue right side clock will read 38:00

Run button on the right will start all operations and the Stop will stop the clock. The green POS button changes from Red to Blue time – you will see the << or >> to show which clock will run.

Pre Game Practice – 10:00 minutes or National event is 9:00 and then the 1 min. count down for Draw to button for hammer

Time out 1:30   **Mid Game break** 5:00   **Break extra end** is 3:00   Extra End 4:30

Know how to enter these times ---- Press the RED INT mode **The time will flash** use the # pad to enter the minute then the seconds 1:30 enter The clear button can be used if a mistake is made or just redo the step.

To abort INT mode time just hit the int mode button and the time will come back on display and you can start the clock

Note: when you use the INT mode the clock will return to that mode for the next selection of that button. If used for 1:30 Time out the 5th end break will then have to be reset to 5:00 and then reset again if a time out is called after the beak. Easy to do. Always match the color on the top of the score board to the left side of the clock. Use tape above the buttons if needed. NOT on the buttons.
